

SAMPLE QUESTION PAPER

2018-19

Design & Innovation (772)

Time: 3 Hrs.

Marks: 60

Instructions

- *All Questions are compulsory*
- *Illustrations were required.*

1. Define the following Terms. (Do any 10 questions)

- 2 Dimensional
- Bridge Design
- Asymmetrical Balance
- 3 Dimensional
- Emphasis
- Colour and Value
- Repetition
- Movement
- Unity
- As Illustration a straight line is _____.
- A plane is _____
- A cube is a set of _____.

Very short Answer (Do any five)

2. How we can explore the creativity of design process of 2D forms through your design. Support your answers the help of Illustration 2
3. How to apply creative design process to develop 3D forms. 2
4. Mention the tools used in designing? 2
5. What are the techniques use for spatial design ? 2
- 6 Which software technique we use for designing to develop digital image. 2
7. Explain the fundamental of 3D design? 2
8. What is design Maquette construction and it use in design. 2

Write short answer (Do any five)

9. Explain the importance of principal and elements in 3D designing? 3
10. Define shop Refit and the importance of it in designing? 3
11. Difference with symmetric & asymmetric. 3
12. Write a short note on the following:- 3
 1. Photo shop
 2. Auto CAD
13. Explain why the new package design is required for a product and its effect on the consumer? 3
14. Explain the basic process of Design? 3
15. What is the use of design in today's scenario? 3

Write Long Answer (Do any five)

16. Design a posler in a 6"×6" on the any of the following topic: 5

- (1) World designer day
 - (2) Child Labour
17. How is colour harmony essential for designer. Justify your answer. 5
18. Explain the techniques to produce digital images with the help of examples. 5
19. Create the two forms of the following themes (each in a different colour) 5
- (a) Spring
 - (b) Winer
20. Difference between 2 diamentional & 3 diamentional 5
21. Difference between Flash and Corel 5
22. Explain the methods of developing 3-D designs 5
