Answer any 1 question out of the given 2 questions. Each question is of mark.		2 x 1 = 2
Q.5	Write down the misconceptions about entrepreneurship?	2
Q.6	Mention any four points that are included in sustainable development?	2

SECTION B

(4 + 8 = 12 marks)

Answer any 04 questions out of the given 06 questions		1 x 4 = 4
Q.7	What is Engine?	1
Q.8	How much percentage of water is drinkable on earth?	1
Q.9	Write the PH of neutral soil.	1

Q.10	In which areas, the main technique of rain water harvesting is surface spreading since large open surface of land are available for soaking?	1
Q.11	What is balanced diet?	1
Q.12	What is the full form of ORS?	1
Answer any 04 questions out of the given 06 questions		2 x 4 = 8
Q.13	Write down any four advantages of saving rainwater.	2
Q.14	Write down the function of Piston ring & Connecting rod.	2
Q.15	How to prepare soil sample ready for soil testing?	2
Q.16	Why mother plant is important in nursery?	2
Q.17	Write down any four factors that can affect our health.	2
Q.18	Name the different types of human blood group.	2

SECTION C **(2 x 4 = 8 marks)**
(COMPETENCY BASED QUESTIONS)

Once upon a time there was small village where young farmer named Chandan was known as nursery Chandan. In two years Chandan earned near about Rs.2.14 lakhs from the sale of grafted seedlings. It has now become a mouth story in the region where the average annual earnings for small farmer like him does not exceed more than Rs.15000.

Chandan attended training on plant nursery operations and management which was conducted by state agriculture department. To produce healthy and viable plants in nursery he got to know about how to raise quality seedlings by sowing seeds on nursery beds/ nursery bags/ seedling tray, grafting and transplanting, etc. Also he used to take care of some environmental conditions and requirements such as viable seeds, favorable temperature, and appropriate level of moisture, fertile and good soil with good water retention capacity. He also studied plant characteristics which must be conducted alongside climatic conditions of the area. Along with this training he also got the training of electric pump fixing and their concerned problems.

One day some of his friends facing issue with motor pump in a nursery. One of the nursery worker was attempting to fix the electrical problem as he wanted to supply water to newly grafts. He observed the circuit connection in that area where he thought the problem was located. He forgot to shut down the main supply so that he did not tested the wire to see if they were live. As soon as the worker holed live wire, he came across electrocuted as a result he collapsed on the floor.

Fortunately Chandan was there and he knew about how to first aid the electrocuted person. First he shut down the power via DOL starter and fuse box. Safely look over the condition of the worker by checking his pulse for the necessity of CPR. He also checked full body to ensure of bleeding, fracture, etc. He handled the situation very well and called the ambulance.

Answer any 02 questions out of the given 03 questions		
Q.19	What procedure worker should have been put in place to prevent this accident?	4
Q.20	Describe the steps of giving first aid to the electrocuted person.	4
Q.21	Which are the requirements and necessary conditions must be met while raising plant nursery?	4
