Methods and Techniques

The techniques used for teaching should promote habits of self-learning and reduce dependence on the teacher. The multi-skill, learner-centric, activity-based approach already recommended for the previous stages of education, is still in place, though it will be used in such a way that silent reading of prescribed selected texts for comprehension will receive greater focus as one of the activities. Learners will be trained to read independently and intelligently, interacting actively with texts and other reference materials (dictionary, thesaurus, encyclopedia, etc.) where necessary. Some pre-reading activity will generally be required, as suggested in the course books. The reading of texts should be followed by post reading activities. It is important to remember that every text can generate different reading strategies. Students should be encouraged to interpret texts in different ways, understand the views of others and present their views on a literary text. Some projects may be assigned to students from time to time, for instance, students may be asked to put together a few literary pieces on a given theme, so as to create a meaningful singular hold.
