- d. Vivan is high in technological intelligence and Ajay is high in integral intelligence.

Q14) Choose the correct match for each behaviour with the aspects related to structure of personality

1

I) grabbing the candy and eating it immediately	i) reality principle
II) asking for permission to eat the candy	ii) moral principle
III) eating the candy is ethically right	iii) pleasure principle

a. I i, II ii, III iii
b. I iii, II ii, III i
c. I iii, II i, III ii
d. I ii, II i, III iii

Section II

Q15) Read the case and answer the questions that follow.

1x3=3

Mr. John is a twenty-seven year old man who consulted a psychologist to discuss what he calls his 'silly habits'. He reports that for several years he had to check and recheck electrical appliances, as well as doors and windows, before leaving home each morning and again before going to bed. At times, the checking has made him late for work and has disturbed his sleep such that he had to get up to check everything several times yet again. When questioned about the reasons for this behaviour, Mr. John reported that he could not stop thinking that electrical appliances may short circuit and cause a disastrous fire or that his house may be broken into and he will lose all valuables. He recognises these concerns and the resulting checking as excessive and unreasonable, yet feels compelled to do something to alleviate the anxiety associated with the thoughts. During counselling, the psychologist found out that some time before the checking rituals

started, a major fire had broken in Mr. John's office and all important papers were destroyed.

Q15 i) Identify Mr. John's disorder.

- a. Generalised anxiety disorder
- b. Major depressive disorders
- c. Obsessive - compulsive disorder
- d. Somatic symptom disorder

Q15 ii) Which of the following statements represents his repetitive thoughts?

- a. For a number of years, he had to check and recheck electrical appliances.
- b. He had to get up to check everything a number of times.
- c. The checking has made him late for work.
- d. He could not stop thinking that electrical appliances may short circuit and cause a disastrous fire.

Q15 iii) Which disorder also comes under the category of obsessive-compulsive and related disorders?

- a. Excoriation disorder
- b. Acute stress disorder
- c. Adjustment disorder
- d. Cyclothymic disorder

Q16 A) Read the case and answer the questions that follow.

1x4=4

On November 26, 2008, about 35 employees of Taj Hotel Mumbai, led by a 24-year old banquet manager, Mallika, were assigned to manage the event in a second-floor banquet room. As they served the main course, they heard what they thought were fireworks at a nearby wedding. In reality, these were the first gunshots from terrorists who were storming the Taj Hotel, Mumbai.

The staff quickly realised something was wrong. Mallika locked the doors and turned off the lights. She asked everyone to lie down quietly under tables and refrain from using cell phones. The group stayed there all night, listening to the terrorists rampaging through the hotel, hurling grenades, firing automatic weapons, and tearing the place apart. During the onslaught on the Taj Mumbai, 31 people died and 28 were hurt, but the very next day the hotel received praise. Its guests were overwhelmed by employees' dedication to duty, their desire to protect guests without considering their own personal safety, and their quick thinking. As many as 11 Taj Mumbai employees—a third of the hotel's casualties—laid down their lives while helping around 1,200 to 1,500 guests escape.

With reference to the above case, answer the following questions:

Q16A In reality, these were the first gunshots from terrorists who were storming the Taj Hotel, Mumbai. The staff quickly realised something was wrong.

Which stage of the General Adaptation Syndrome model were the staff in?

- a. Resistance
- b. Alarm reaction
- c. Exhaustion
- d. Burnout

Q16A *‘Mallika locked the doors and turned off the lights. She asked everyone to lie down quietly under tables and refrain from using cell phones’.*
From these lines, identify the coping strategy used by Mallika.

- a. Task-oriented
- b. Avoidance-oriented
- c. Emotion-oriented
- d. Biofeedback

Q16 A Which of the following set of words best describe Mallika’s hardiness?

- iii)
- a. Commitment, confidence, control
 - b. Challenge, control, calmness
 - c. Commitment, control, challenge
 - d. Control, commitment, conviction

Q16 A Selye’s GAS model has been criticised largely for assigning limited role tofactors.

- iv)
- a. Biological
 - b. Physical
 - c. Physiological
 - d. Psychological

OR

Q16 B) Read the case and answer the questions that follow.

1x4=4

In the Army, one cannot sit back and relax. A few years after the Kargil War, Deepchand’s regiment was posted to Rajasthan. While setting up an ammunition store, a bomb was accidentally detonated. In the explosion, Deepchand lost his fingers. Later both his legs and right arm were amputated. After 24 hours and 17 bottles of blood, he finally gained consciousness.

After the accident, lying on the hospital bed, Deepchand mulled over why he met with an accident. Being an athlete, he felt bad about not being able to run for the state again. But as they say, once a soldier, always a soldier. *“I trained myself to walk with the help of prosthetics. I learnt to ride a scooter and use a computer. And there has been no looking back,”* he said.

Deepchand has worked for the country without flinching even an eyelid. And in doing so, in an unfortunate event, he met with an accident and lost his limbs. Does he regret his childhood dream to become an army jawan? The proud man who stands on his prosthetic feet says he does not.

“The accident could have happened to me in any profession. At least it happened in the line of fire. I want to be reborn a soldier. There’s nothing greater than serving your country,” he said.

Q16 B Identify the phenomenon that Deepchand is experiencing immediately after regaining consciousness in the hospital.

- i) a. Eustress
- b. Distress
- c. Social Pressure
- d. Hassles

Q16B Deepchand’s secondary appraisal of the event would be _____

- ii) a. Appraisal of the threat
- b. Appraisal of the harm
- c. Appraisal of his coping abilities and resources
- d. Appraisal of the challenges ahead

Q16B Based on the below given statement, what will determine Deepchand’s cognitive appraisal of the event:

“The accident could have happened to me in any profession. At least it happened in the line of fire. I want to be reborn a soldier. There’s nothing greater than serving your country,” he said.

- a. Controllability only
- b. Past and present experiences
- c. Present situation only
- d. Past experiences and controllability

Q16B What was the source of Deepchand’s stress?

- iv) a. Life events
- b. Traumatic events
- c. Hassles
- d. Environmental

SECTION III

- Q17) Distinguish between social pressures and social stress. 2
- Q18) Fatima is experiencing generalised anxiety disorder. Enumerate any two causes with reference to diathesis stress model which may have led to the disorder. 2
- Q19) Differentiate between hostile aggression and proactive aggression. 2

Q20A) What are life skills? List any two life skills. 2

OR

Q20B) What is psychoneuroimmunology? 2

Q 21) What is group polarisation? 2

Q22 A) A client experiences irrational thoughts that are self-defeating in nature. Suggest a suitable therapy that will help her/him to reduce her/his distress. Also provide the rationale for selecting this therapy. 2

OR

Q22 B) Analyse the chief benefit to the client in both behaviour and humanistic therapies? 2

SECTION IV

Q23) Ananya is a good dancer who is well adjusted in school as she cooperates with her teachers and classmates in all school related activities. She is also liked by friends and family. Identify and explain the types of intelligences that Ananya is exhibiting. 3

Q24) What is a trait? Describe Cattell's trait theory. 3
